Facility – How to Upload COVID-19 CSV Data Files

Description

As part of CDC's ongoing COVID-19 response, NHSN facilities can enter daily counts of suspected or confirmed cases and current use and availability of hospital beds and mechanical ventilators as well as both healthcare worker staffing and supply status and availability into NHSN via the COVID-19 Module. A facility can opt to have a group report data on its behalf if the group has the capability to collect/export facility level data for its member.

Please note that a facility should decide which of the groups that it has granted access to NHSN for the purpose of viewing their data will also have access to upload data on their behalf using the CSV bulk upload process. This is important since data uploaded into NHSN for a facility by one group or supergroup via the CSV bulk upload can be overwritten by a second group uploading data for the facility at a later time or date. Therefore, NHSN recommends that facilities only grant access to one group/supergroup to upload data on their behalf. Groups or Supergroup include health departments and hospital associations. It is also important to note that if a facility has entered its own data, it will not be overwritten by a bulk upload by a group/supergroup.

Facilities looking to upload their data by working directly with a vendor will need to work with the vendor directly to provide their OrgID and establish the process. Vendors (e.g., EHR providers, EOC providers, etc.) intending to provide COVID-19 CSV uploads on behalf of NHSN facilities please submit an inquiry to NHSN@cdc.gov with the title "Vendor Support for NHSN COVID-19 Facility Reporting." NHSN will follow up to confirm procedural details as the process may differ by vendor.

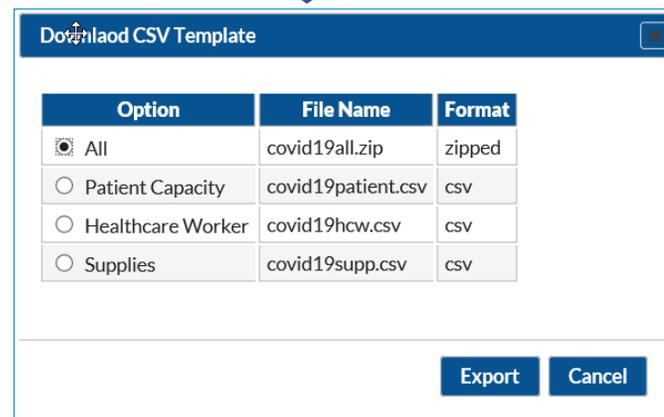

Instructions

1. **Select Module**—After logging into an NHSN component, select COVID-19 from the menu bar to get to the COVID-19 Module calendar view as shown in the image to the right.

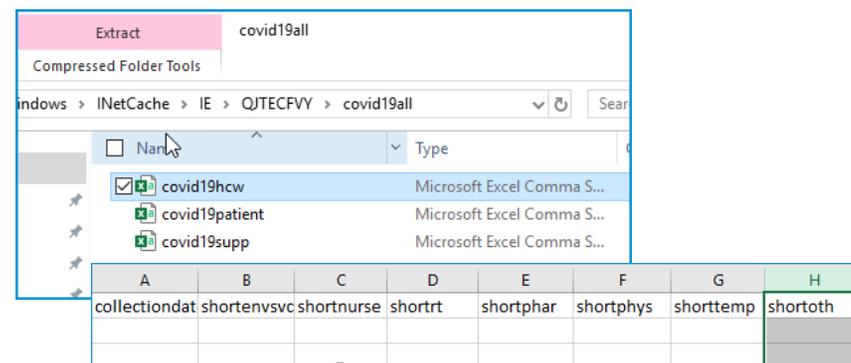

The screenshot displays the NHSN COVID-19 Module interface. On the left is a navigation menu with the following items: NHSN Home, Alerts, Dashboard, Reporting Plan, Patient, Event, Procedure, Summary Data, COVID-19 (highlighted), Import/Export, Surveys, Analysis, and Users. The main content area is titled "COVID-19" and includes a prompt: "Click a cell to begin entering data on the day for which". Below this is a calendar for the period "29 March 2020 - 09 May 2020". The calendar shows dates 29, 30, 31, 05, 06, 07, 12, 13, and 14. On 06, the "Patient" cell is selected, and a dropdown menu is visible with options: "20 Patient", "HCW", and "Supplies", each with a checked checkbox. A "Record" button is located in the top right corner of the calendar area.

2. **Download Template** – CSV templates for each pathway can be found by using the Download CSV button. A window will open with the title and options to download files for each pathway separately, or to download a .zip file that includes all 3 pathway templates.

3. **Select Template** – The headers of the CSV file mimic the titles of data fields in the screenshot to the right and appear in the same order as the data fields shown tables 1, 2, and 3 below. Please visit the tables at the end of this document (starting on page 4) to learn more about the variables used in this module. The CSV file Template for all 3 pathways can also be found on the NHSN COVID-19 Webpage: <https://www.cdc.gov/nhsn/acute-care-hospital/covid19/index.html>.

4. **Enter Data**—Using the templates, populate each variable with the appropriate data. Save your file in order to upload it in NHSN. Please see the example to the right to view completed data for the Healthcare Worker Pathway for the dates between 4/1/2020-4/7/2020.

5. **Upload CSV**—Return to the COVID-19 Module tab in NHSN and select upload CSV at the bottom of the page. A screen will appear to add the CSV file. Browse for the file and then click Upload CSV to begin the import. View the data as referenced in step 1 of this section.

Note: There are different file formats for the different Pathways (Patient Capacity, Healthcare Worker, and Supplies). There is no need to specify which type of format being imported; just ensure that the format and values are correct.

6. **View Data** – A message that indicates the upload was successful will be generated. The calendar view of the COVID-19 module will automatically populate the days for uploaded data. Users can then select a date for which data was added to view and edit the record.
